The Chinese government is a threat to the entire world

The Chinese government is a threat to the entire world

Deputy amir of the
East Turkistan Islamic Party
- Mr (Shaykh) Abd al-Salam

February 2025
Sha ‘aban 1446

Media center of the
East Turkistan Islamic Party
(Voice of Islam)

The issue of East Turkistan and the Uyghurs is not an internal Chinese issue

Before I define in this message the oppressive Chinese government and its dictatorial leader Xi Jinping and the fact that he is a threat to the world, I will clarify that East Turkistan is not an internal Chinese issue, because the oppression that China practises in East Turkistan is the beginning of its evil policies and dangerous plans against the entire world.

Dear readers: East Turkistan is an independent state and its people are a people who enjoyed self-rule, but since the Chinese government occupied our homeland in 1949, it has stolen our resources above and under the ground, killed our people, and implemented a number of barbaric acts, such that China has wiped East Turkistan off the world map, and declared the East Turkistan issue to be an "internal issue for us." This is a blatant insult and clear aggression against the people of East Turkistan

before the entire world's eyes. After this clear oppression and repression, the "East Turkistan Islamic Party" appeared in order to liberate the people of East Turkistan from the oppression of the Chinese occupiers. The people of East Turkistan completely reject the occupation and oppression.

What we would like to tell all the peoples and states of the world is that the cause of East Turkeistan (which China falsely calls "Xinjiang") is not an internal Chinese issue at all, but rather East Turkistan is an independent Turkic state in which peoples who speak a Turkish language live.

The entire world must understand that China destabilises global peace.

Our cause is not merely a cause of rights or a state issue, but rather it is a struggle for freedom and independence on the path of justice.

We are not Chinese in any sense. Rather we are an independent nation and state. East Turkistan's area is

more than 1.8 million square kilometres, and its inhabitants are more than 40 million people. For so long East Turkistan was an independent state over the course of history, such that in the recent period between 1933 and 1944, our ancestors established an independent state and declared it to the entire world. We are striving for the independence of our state and calling for freedom. Independence is our legitimate right.

The Chinese Communist Party is a threat to all states and individuals

Today, Islam, freedom and human rights have fallen into great danger. Why? Because the Chinese government, for the sake of its own interests, is exploiting the economy and defence industries to subjugate small weak states, destroying their peace, independence, traditions, language and culture, as well as human rights in those places.

Currently, there is an ongoing process of destroying freedom in South Asia and Central Asia which have

a high population density. All this is happening because of China and some states that have fallen into its trap.

China continues to implement a very dangerous agenda through seemingly benign diplomacy, military force, repression, oppression and killing. In addition, terrorist activities continue to take place in Asia under China's leadership and directives.

All this is happening in front of the eyes of all the states that describe themselves as "upholders of peace, independence and human rights". There are thousands of laws in the world to protect peace, independence and brotherhood, but these laws have failed in stopping the barbaric crimes that the Chinese commit, or they have remained silent in the face of them.

In various parts of the world, there are a number of organisations affiliated with Islamic states, and despite this all of them have been silent in the fact of the oppression that China practises against the

Uyghurs. When will these states break their silence and stand against China?! When will they stand against this oppression and extend the hand of help to the oppressed? This is the greatest question in our time.

The Chinese Communist Party and its leader Xi Jinping are the symbol of terrorism, barbarity and instability. The Chinese president constitutes a threat to Asia and the world. It is very important for all the states of the world to realise the evil of the Chinese Communist Party and President Xi Jinping.

China is striving to plunder and steal from states rich in natural resources under the rubric of business and strategic agreements.

The Communist Party invests and offers loans to economically weak states under the pretext of friendship and cooperation. As a result, the states that are worse off economically cannot pay their debts. China exploits this opportunity to seize important sites in those states in exchange for those debts, and

starts to plunder their resources and seize their economic centres and strategic ports.

The Chinese regime does not deserve any friendship and cooperation. For its own interests, China establishes relationships of friendship with economically weak small states that are also rich in minerals and natural resources, and begins implementing its evil plans. It offers loans that exceed the needs of those states in order to bankrupt them. The Chinese Communist Party has been thinking about its enemies and future for 100 years. Thus, it is striving to become the number one global power through seizing the strategic sites, international airports, harbours and natural resources of small states. China is implementing these evil plans it has by ensnaring its enemies in the trap without their realising.

For example: the occupation of East Turkistan, Uganda international airport, Hambantota harbour in Sri Lanka, the port of Gwadar and Balochistan in Pakistan, and its plans to seize Inner Mongolia,

Tibet, Taiwan, Manchuria, Burma, Nepal and Bhutan.

Oppressive China has recently revealed its new map. Look at it closely and in detail!

All know the future aims of Chinese economic diplomacy. For example: the Belt and Road Initiative of the Chinese Communist Party and the Chinese-Pakistani economic passage, and the high-speed railway network between China and Europe. All who investigate this matter can realise that all these initiatives are part of China's efforts to gain hegemony over the entire world.

The Chinese Communist Party's crimes against the people of East Turkistan

Since China's occupation of East Turkistan in 1949, it has implemented and still implements barbaric operations of repression and genocide that go beyond the borders of humanity, in an effort to realise its evil plan embodied in completely wiping out the people

of East Turkistan. The Chinese authorities have recently detained women, children, elderly and innocent civilians in camps called “re-education camps” that are harsher than prisons.

The circumstances inside these prisons are indescribable. Among the practises: attacking women, stealing human body parts from healthy individuals, killing through use of unknown medicines, detaining 40-50 people in a cell designed for 10 people over a period of years.

As for outside the camps, endless gatherings are organised to obstruct means of making a living, while the employment of educated Uyghur youth is rejected. Moreover, girls are forced to marry under threat of arrest of their families. If one of the Chinese people looks at a Muslim Uyghur girl with evil intent, they arrest her parents and the men in her family and place them in the camps and pressure her into forced marriage, saying: “If you get married, you will save your family.” If she rejects marriage, they force her into it. They live in circumstances in

which they don’t enjoy the simplest of basic rights.

In addition to this, the Chinese authorities are erasing the Uyghurs’ heritage, culture, identity, religion, language and basic rights. Schools and mosques are being destroyed; the original Uyghur inhabitants are being replaced with Chinese settlers. The Uyghurs are prohibited from working in agriculture, government jobs and business. They are also forbidden from speaking in their original Uyghur language in public places, reciting the Qur’an and following world news.

China’s barbarity and repression of the Uyghurs represent an insult to the entire world and a slap in the face of the states and leaders who call to protect human rights. Through this, China is testing the extent of the international community’s ability to confront it.

It is very important to understand the evil policies of the Chinese Communist Party

It is very important for all to understand China's strategy we have described above.

China does not only implement this policy against the Uyghurs, but also against all ethnic minorities: none of the non-Chinese ethnicities are safe in China and the states that it occupies or intends to occupy.

For example, the Hui, Tibetans, people of Inner Mongolia, Hong Kong, Taiwan and others…from another angle, China is continuing its policy of expansion towards all neighbouring states, attacking them and creating political instability on the borders.

The new map of China has been openly published on the Internet in front of everyone, as China has sought to claim Aksai Chin, Arunachal Pradesh, Doklam, Jalwan and Tibet as its territories. In addition, it has depicted Malaysia, Brunei, Vietnam, Philippines and Taiwan as part of China.

The time has come to put an end to the global problem embodied in China as a symbol of chaos,

and the expansionist government, and the dictatorial president. Internally, the Chinese people themselves have grown tired of the repression of this regime. If the Chinese crisis is not contained today, the Chinese Communist Party will tomorrow become more powerful economically, militarily and politically, and will put an end to world peace and freedom. Therefore, all states must take urgent measures against China.

Our request to all states is to not grant China opportunities for business and investment in their countries. Your simple mistaken decision may lead to the destruction of your country and your creation of unemployment. We hope today that you will not all be silent about the barbarity that has been committed against the people of East Turkistan, but rather that you will stand against it! Resisting these evil acts of China against humanity is the first obligation of all the peoples of the world.

Many consider the Chinese government to be “strong in terms of economy and defence,” but this is an

erroneous opinion. For the Chinese government, despite its large number of inhabitants, is very weak, corrupt, on the verge of internal collapse, and has not experienced a war for many years, and is only known for its economy. In addition, the Chinese people are fed up of the government's evil and tyranny. The regime that loses its people's support and becomes more oppressive will very quickly come to an end. If you want to stop Chinese expansionism, you must help all the states occupied by China to achieve liberation. Only then will the Chinese repression, enmity and threat end, and the global situation will stabilise.

The Chinese Communist Party and East Turkistan

How far are the Chinese authorities concerned today about the people of East Turkistan? In particular, how worried are they about the East Turkistan Islamic Party that has been composed of armed fighters from East Turkistan? If you help East Turkistan and East Turkistan becomes independent,

China's expansionist plan for the world will fail, just as the Chinese Belt and Road strategy will fail. China today tells the world that "there is no force that can stop us." This is an insult to all the peoples of the world. But the entire world is silent instead of responding to this insult. If you think about how to respond to this insult, help the people of East Turkistan! Many of the states of the world will not be safe from China's expansionist policies until the Chinese Communist Party is defeated.

East Turkistan is our homeland, and it is not Chinese land at all. This is your problem and our problem. We must end this problem together! Why are you silent? Open your eyes! Look at the barbarity that is happening in East Turkistan! Stand against this, do something! There is a well-known principle that states: the enemy of my enemy is my friend. Consider us "your friends" against China! If you want to destroy China, it is very important for you to help us, because your help for us is an attack and strike against China. If you all help us today, then after our independence, you will be safe from

China’s arrogance, oppression and expansionist policies.

For a number of years, East Turkistan has been a fortress preventing China’s expansion towards Central and West Asia. The Chinese authorities are trying, with all their force, to destroy this fortress. Understanding the strategic importance of East Turkistan’s position helps to understand the Chinese Communist Party’s evil plan there. It also contributes to all states’ understanding of the East Turkistan people’s services and sacrifices. If you don’t understand this today, you will understand it when your state collapses and is occupied, but then it will be too late and you will have no space for regret. Wake up before this happens! The people of East Turkistan protect the world from Chinese barbarism and expansionism. It is very important for you to understand this. Therefore, I mentioned previously that East Turkistan is your problem and our problem.

Over the past 75 years, the aggressive Chinese government has committed many atrocities against

the people of East Turkistan. Since that time and until today, we see the majority's silence.

If you continue to be silent, know that our present will be your future. Don't you know how to express anger?! If you do not want to help us, don't stand in our way, and take a position against China! Don't apply erroneous policies against us! Stop imposing unnecessary sanctions on us in order to reassure China! We are not "terrorists," but rather we are a popular movement formed from the struggle of an oppressed people in the path of justice against the occupying enemy. It is very important for the entire world to understand the East Turkistan Islamic Party's aims. Their activities against the Chinese government prevent the threats that are heading towards you. Your provision of help to the East Turkistan Islamic Party is useful to you. We are an organisation that has emerged to stop Chinese expansionism, expose their evils, and liberate our homeland and people from oppression. The East Turkistan Islamic Party does not constitute a threat to any state except the aggressive and tyrannical

Chinese government.

The Belt and Road Initiative

Why is the Chinese government increasing its oppression of the people of East Turkistan?

Is the ethnic and cultural genocide that the Chinese government is implementing against the Uyghurs in East Turkistan because of extremism as China claims? Or is it a plan that is being implemented to serve Chinese interests and its global expansionism?

The people of East Turkistan are not “terrorists” or “extremists” as lying Chinese propaganda claims. East Turkistan is not an internal Chinese issue. Repression and colonialism there are barbarity practised by the Chinese government for its particular interests and for their desire to expand to the world. The lands of East Turkistan, in addition to being rich in resources are also a very important geographic position for China’s plans to expand westwards and seize control of the global economy

via the historic Silk Route, and colonise other sates through business.

The Chinese government has realised for a long time that East Turkestan plays a decisive role in its important plans. Therefore, East Turkistan is considered an “enemy” of these plans and is continuing to practise the most barbaric forms of oppression and repression against the innocent people. Thus, East Turkistan and its people have become victims of the Chinese Belt and Road policy.

In a conference held in Berlin with the title “The negative impacts of the Chinese Belt and Road Initiative,” experts described the Uyghurs as being the “first victims of this initiative.”

The experts participating in the conference clarified with examples that the Chinese “Belt and Road” policy is not a policy that benefits humanity and neighbouring states, but rather is a harmful policy.

In his speech, the Indian expert Basal affirmed that

the Chinese colonialist ideology does not respond any other nation, and that when the Chinese occupy a land, they soon claim that “this land was always part of China.” He also warned of this colonialist nature of China, noting that areas that are currently causing the border conflict between China and India.

In his speech, the Japanese expert Sonjiki described the Uyghurs, Tibetans and southern Mongolians as being “the first victims of the Chinese Belt and Road policy,” warning the peoples of the world that the fate that confronted these peoples would confront them in the future.

In 2013, the Chinese president Xi Jinping launched the “Belt and Road” initiative, affirming the strategic importance of East Turkistan (the so-called autonomous Uyghur Xinjiang region) in this initiative.

According to the New Silk Road strategy, the Chinese government has invested large amounts of money in East Turkistan, claiming to strengthen

economic ties with neighbouring states. Even so, data point to no exchange in the size of economic trade with neighbouring states in recent years. What is the reason for this? Observers point out that this is tied to the ultimate aim of the Chinese strategy of the New Silk Road.

The “Belt and Road” initiative that the Chinese president Xi Jinping launched is considered one of the most important plans in Chinese economic diplomacy. Western observers often note how China will implement this huge plan in a complex geographic region. It is well-known that East Turkistan is considered “one of the most important pivotal points in the building of the new Silk Road” in view of its natural strategic resources, and the fact that it is a crossing point for oil pipelines from Central Asia, and China’s gateway towards the West.

Since the Chinese government’s announcement of this plan, reports have emerged about big investments to invigorate East Turkistan’s economy and strengthen its economic relations with Central

Asian states like Kazakhstan, Kyrgyzstan, Uzbekistan and Turkmenistan, and contract agreements in the areas of power, crude resources, textiles and others.

Despite this, according to an article published in the Financial Times newspaper: “So-called Xinjiang (East Turkistan) raises doubts about the Chinese Belt and Road policy,” no change in the size of trade with these states has arisen since the announcement of this new strategy. Statistics in the article point out that in 2008, East Turkistan’s gross trade with Central Asian states constituted more than 15% of China’s gross trade with these states.

But by 2015, this figure reduced to around 10%. In other words, since the announcement of the Belt and Road initiative for Xinjiang in 2013, there has been no change in the size of trade between East Turkistan and Central Asian states, and in fact it has decreased in comparison with 2008.

So what is the reason for this? In this context, Dr.

Arkin Akram from Turkey says: “This plan fundamentally aims to tie China to Europe in order to marginalise America from the region. Therefore, with the exception of the geo-strategic importance of Central Asian states, their economic importance is not great.”

To summarise: the Belt and Road Initiative is not merely economic development and strengthening regional ties as China claims, but rather, as political analysts and experts say: “A means of expanding Chinese economic and political influence and colonising other states.”

Why did the Chinese government announce this plan during a visit to Kazakhstan and not in China itself? Because it is an expression of global expansionism. The Belt and Road Initiative was inserted into the Chinese Communist Party’s foundational constitution in 2017. The Xi Jinping government described this initiative as being “a strengthening of regional ties and aspiring to a bright future.”

In all its speeches, China promotes the idea of "building a shared community and fate for humanity"- the real meaning of this is "Sinification the entire world or subjugating it under Chinese leadership."

China's ultimate plan is to implement its expansionist plans via land routes through the Belt and Road Initiative.

Therefore, all must realise that the Belt and Road Initiative of the Chinese government constitutes a threat to all states. The Belt and Road project is the building of an important strategic route that encompasses the transfer of power from West to East, the transfer of the resources of Central Asian states like Tajikistan, Kyrgyzstan, Kazakhstan and Turkmenistan to China, and the transfer of oil and natural resources purchased from Arab states and Iran to China via East Turkistan, and the transfer of Chinese business goods to global markets via Pakistan's Gwadar port.

Through this, China is striving to colonise other states. It is not interested in the interests of other states and regions, but rather things like a businessman intending to bankrupt and colonise your state. After colonising East Turkistan, the Chinese infiltration into states like Tajikistan and Pakistan is continuing through the leasing of the Gwadar port for 100 years, and specifying huge investments for the building of a military base in the Badakhshan region in Tajikistan, illustrating China's intention of occupying these states. East Turkistan has been a barrier protecting neighbouring states from Chinese occupation.

It is very important for the entire world to understand China's Belt and Road policy. There are many signs and proofs regarding this matter, but I have spoken about the matter in summary in order to avoid prolonging the article.

If you understand China through reading this article, you can understand the East Turkistan Islamic Party, which represents the military force for the people of

East Turkistan. They are an organisation fighting for their religion, homeland and people's independence. They do not constitute a threat to you, but rather are working to prevent the threat that is coming for you. Beware of describing them as "terrorists" and leaving them without aid!

To all the states of the world:

All states and peoples of the world must realise that our enemy is the Chinese Communist Party and the oppressive Chinese dictator Xi Jinping who have colonise our homeland and oppressed our innocent people. We are fighting for our independence. We are not terrorists, but rather people fighting for our people's freedom and independence. We are fighting for our fights, freedom, culture, people and homeland's independence.

It is not wrong to ask for the freedom of the homeland occupied by a tyrannical aggressor like China and engaging in armed struggle against it. Armed resistance is necessary when required in order

to obtain freedom.

All states will be happy and delight with our important strategic plans and our situation after independence. Our struggle against the oppressive and tyrannical Chinese regime is legitimate. We will not stop this struggle against China until we obtain independence and freedom. Whatever happens, we will fight till the last breath.

All states hostile to the Chinese regime and the states that China has occupied must support this struggle of ours. Taiwan and the Chinese people must also support our movement and understand it correctly. The time has come for the common fight against the enemy. If we stand together against this powerful enemy from all sides, the enemy will certainly be defeated. Therefore, we must all attack the enemy from all sides. Defeating the Chinese regime is an opportunity for all the states of the world, including America, Europe, Japan, India, Taiwan, Mongolia, Tibet and other states harmed by its policies, to be freed from its influence.

We also say to all states, organisations and individuals: do not be deceived by the false news and misleading propaganda of the Chinese regime! In this context I would like to borrow some of the valuable words that the Blue Turks' emperor Sultan Baylaga Khan inscribed on stone in Orkhon writing many centuries ago, so that future generations and the entire world could know about their evils:

"The Chinese people speak fine words, and their silk fabrics are soft. They deceive foreign nations and make them become close to them with their honey-sweet words and their gifts. After they make them become close to them, they plot evil conspiracies against them."

I have prepared this message in order to make all states, organisations and people understand the barbarity, evil and scheming of the Chinese government, and that it is a threat to the entire world. These bitter realities that we see are spreading in the entire world. Therefore, I advise the entire world not

to be friends with China and to realise its evil policies and mobilise against it.

To the Chinese government:

We say to the Chinese government: why do you kill innocents and throw them in prisons and detention camps? End the oppression and occupation of the people of East Turkistan, and let them live as free and independent people! Otherwise, you will bring catastrophes on yourselves, and regret will no longer be beneficial. Every aggression ends with humiliation. And no barbaric act against us will remain without a response. Therefore, if you stop the aggression and oppression, you will benefit. Otherwise, the price of this will grow day after day. Know that we will continue the struggle until we obtain our independence. No one will be able to stop us. You are playing with fire. And this fire will turn the Chinese Communist Party into ashes one day.

Oh, aggressive Chinese Communist Party, remember that the people of East Turkistan will never be

pleased with occupation and colonisation. This courageous and intrepid people will end the oppression and occupation and announce their independence, if God wills!

If you leave East Turkistan, it will be better for you and your future. Otherwise, you will not see good from us. We have warned you and advised you.

To the Chinese people:

We say to the Chinese people: we Uyghurs in East Turkistan are not killers of innocents and have not borne arms to oppress people, but rather, as you know, the Chinese Communist Party and your president Xi Jinping in their erroneous decisions have committed a genocide against an innocent people and nation, and have engaged in harsh barbaric acts, and have published false reports against us. We have borne arms to stop this oppression and tyranny, and to bring security and freedom to our religion, people and homeland, and likewise to defend our rights. We say to you: stop

these erroneous acts of your government and warn them to leave East Turkistan! Demonstrate against the Chinese government on this matter and exert various forms of pressure against it. Otherwise, you will become the victims of the Chinese Communist Party's evil policies. Their policies have now made the entire world an enemy of them. In the near future, decisive battles will break out between the Chinese government and entire world. In the war, innocent people will be killed, and towns, houses and the economy will be destroyed. Peace will be disturbed.

The main target of our group is the Chinese government that has occupied East Turkistan. We are compelled to wage armed struggle with the Chinese Communist Party in order to defend our rights. If the aggressive Chinese Communist Party does not stop its occupation and oppression of the people of East Turkistan and go back from where it came, the war with them will never stop.

We are aiming to establish a secure state in East Turkistan where every person lives protected with

their rights according to the state’s constitution, while ending oppression and tyranny.
